6 Career Women Win Awards

CPYRGHT

CPYRGHT

WASHINGTON, Feb. 7 (AP).

Six Government career women were announced Sunday as winners of the 1965 Federal Woman's Award for outstanding contributions in fields from cryptology to missiles.

They were cited as examples of the key roles—and jobs—for women in Federal fields.

PICKED FROM 600,000

"Proof that woman can excel in any field of endeavor," said Mrs. Katie Louchheim, who is chairman of the Federal Woman's Award Committee and also Deputy Assistant Secretary of State for Community Advisory Services.

The winners, who will receive their awards at a fifth annual dinner here March 2, were picked by a non-Government panel of judges from among about 600,000 women in Government employ.

Their salaries range from \$18,000 to \$22,650 a year, and they told a news conference they think there's great opportunity for young women to follow careers like theirs.

CRYPTOLOGIST CITED

The 1965 winners:

—Cryptologist Ann Z. Caracristi, born in Bronxville, N. Y., started in a wartime job as research analyst after graduating from Russell Sage College.

—Dr. Elizabeth B. Drewry, expert in historical archives and records, has been director of the Government-run, privately built Franklin D. Roosevelt Library at Hyde Park, N. Y., since 1961.

STATISTICS EXPERT

—Navy mathematician Mrs. Dorothy Morrow Gifford, an

expert in statistics, whose new research programs provided major contributions to the Polaris missile program and to electronic reliability throughout the Navy.

—Diplomat Carol C. Laise, from Winchester, Va., advanced through Government ranks from junior professional assistant in 1940 to her \$22,650 State Department post of Deputy Director of the Office of South Asian Affairs.

CANCER RESEARCHER

—Cancer researcher Sarah Elizabeth Stewart, whose discoveries in virus studies are credited with changing the course of virus cancer research. With the rank of medical director in the Public Health Service, she heads the human virus studies section of the Laboratory of Viral Carcinogenesis at the National Cancer Institute.

—In top-secret economic intelligence, Dr. Penelope Hartland Thunberg directs a large group of researchers gathering information on economic aspects of the Sino-Soviet

bloc. She's deputy chief of the International Division of the Central Intelligence Agency.
